

# Anime Score on MAL based on Type and Rating

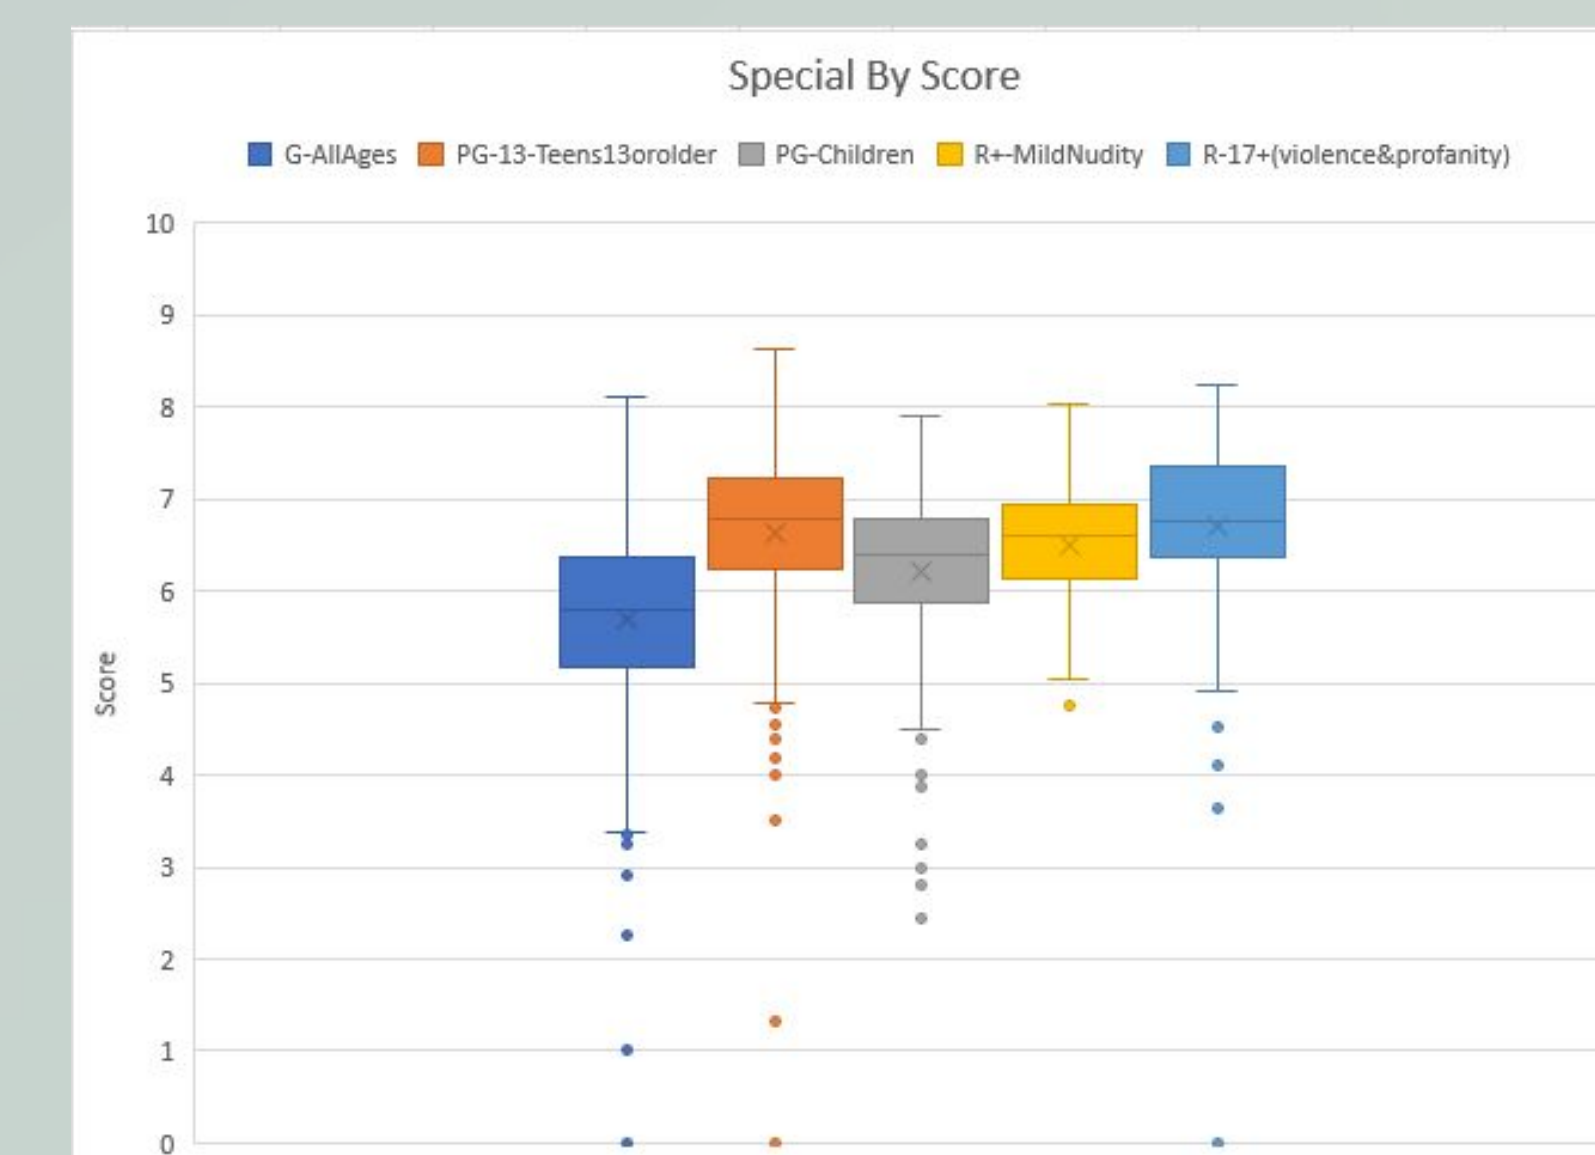

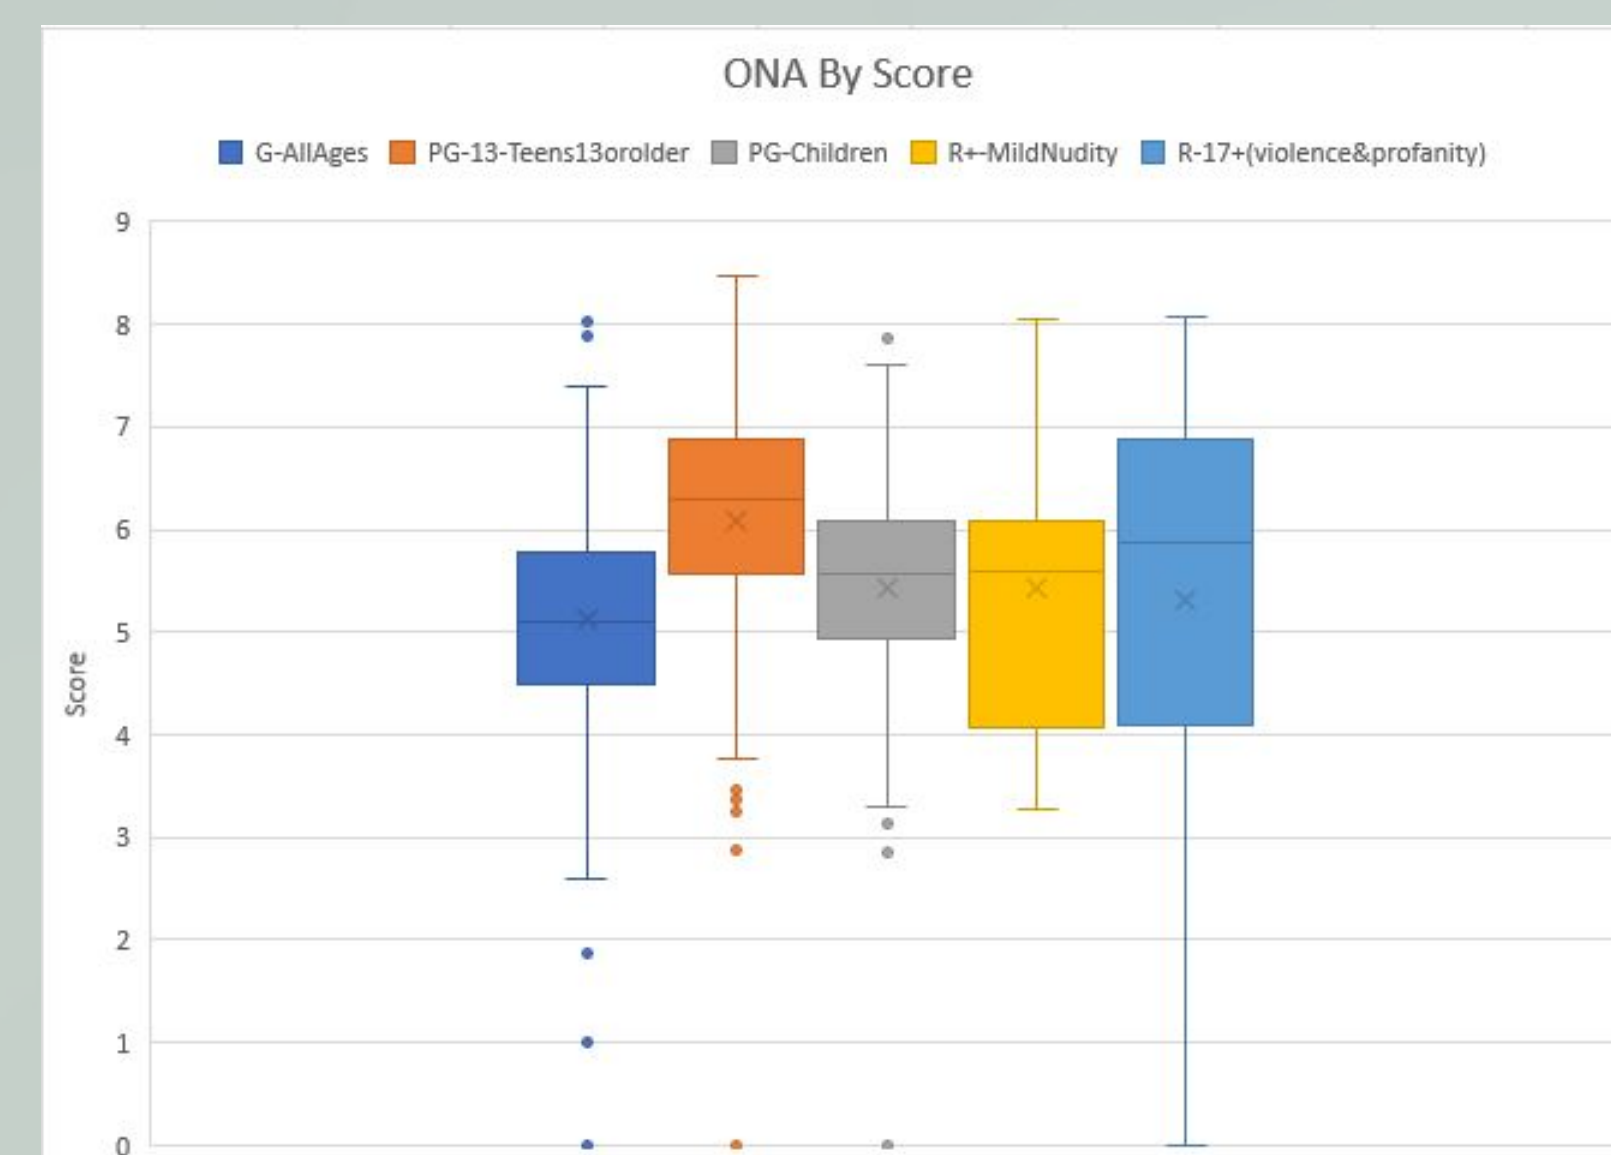

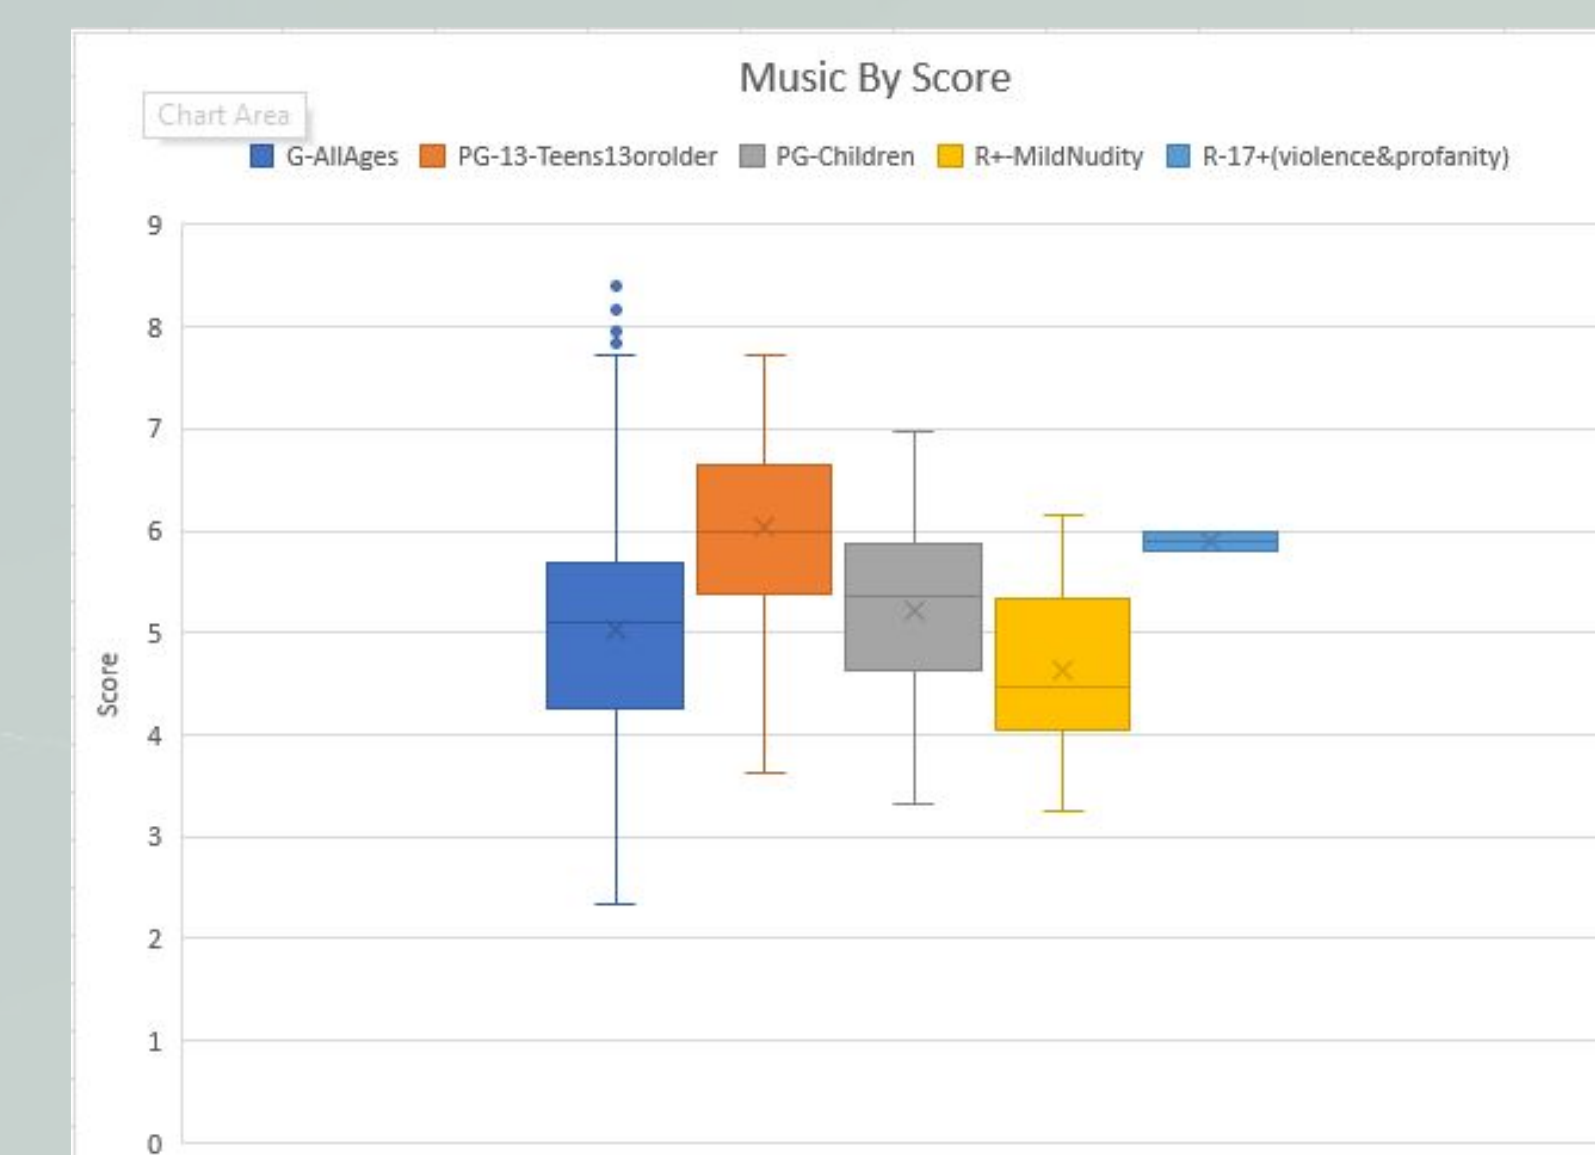

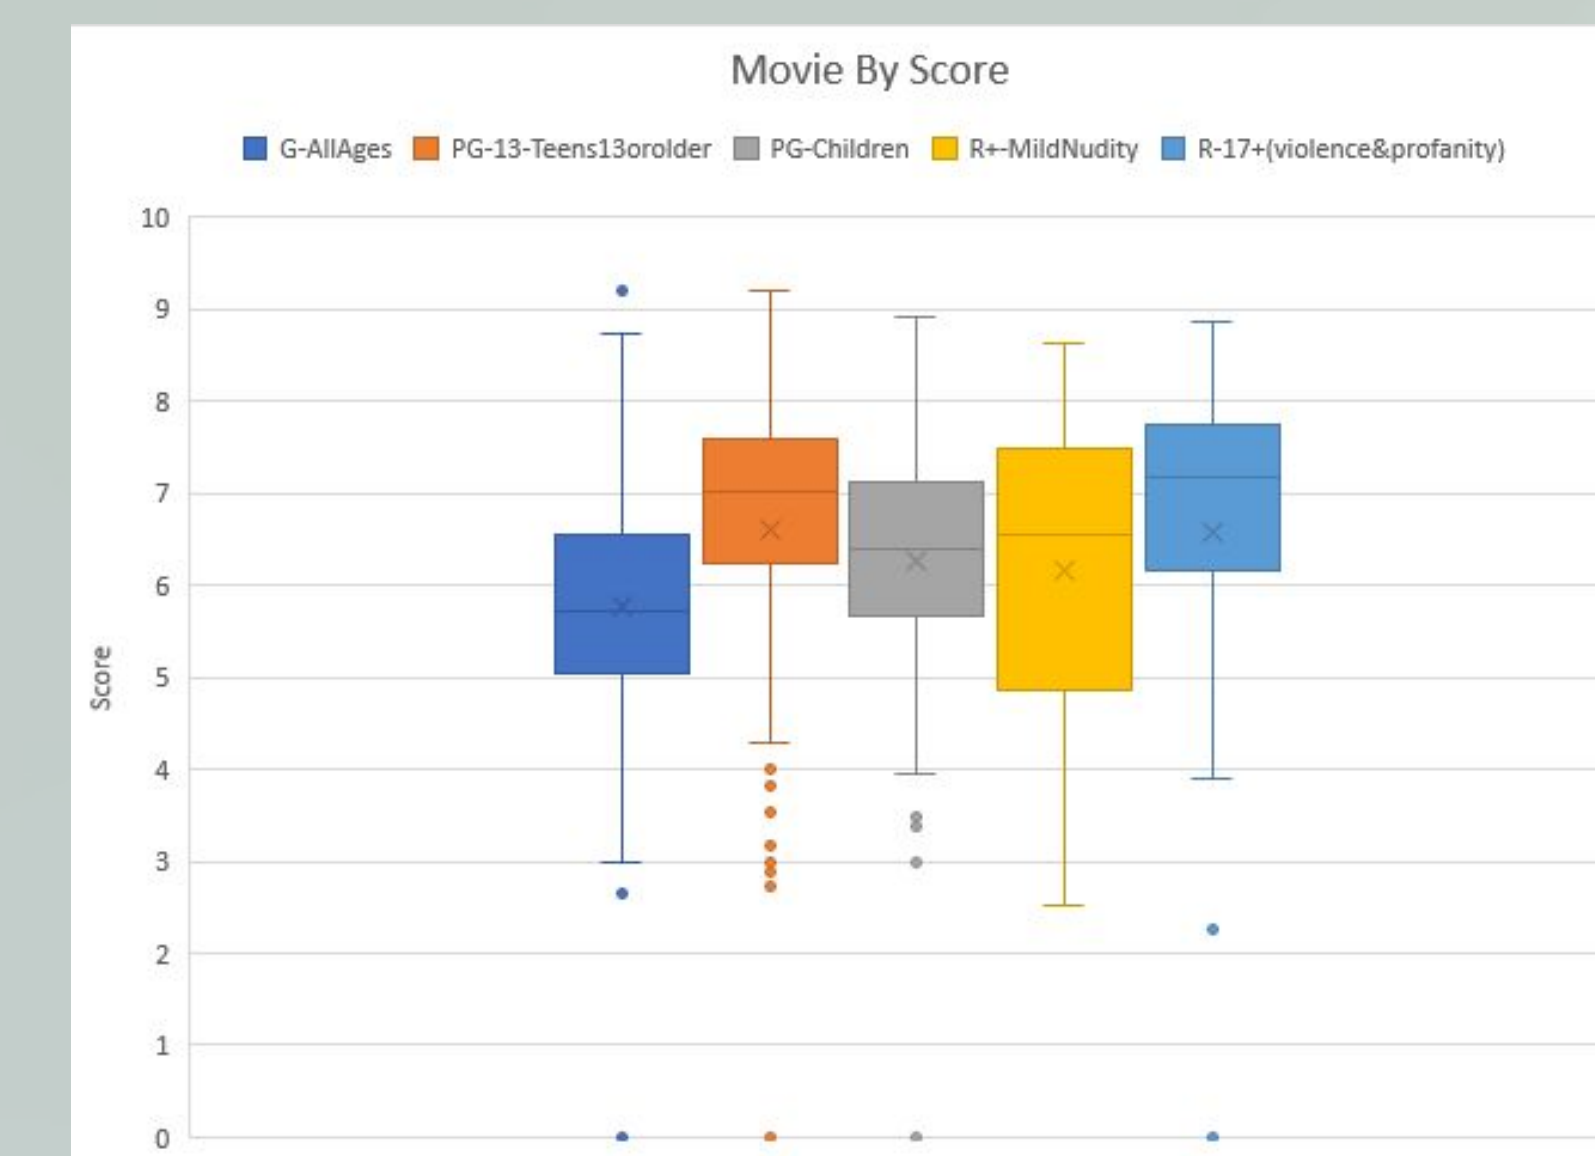

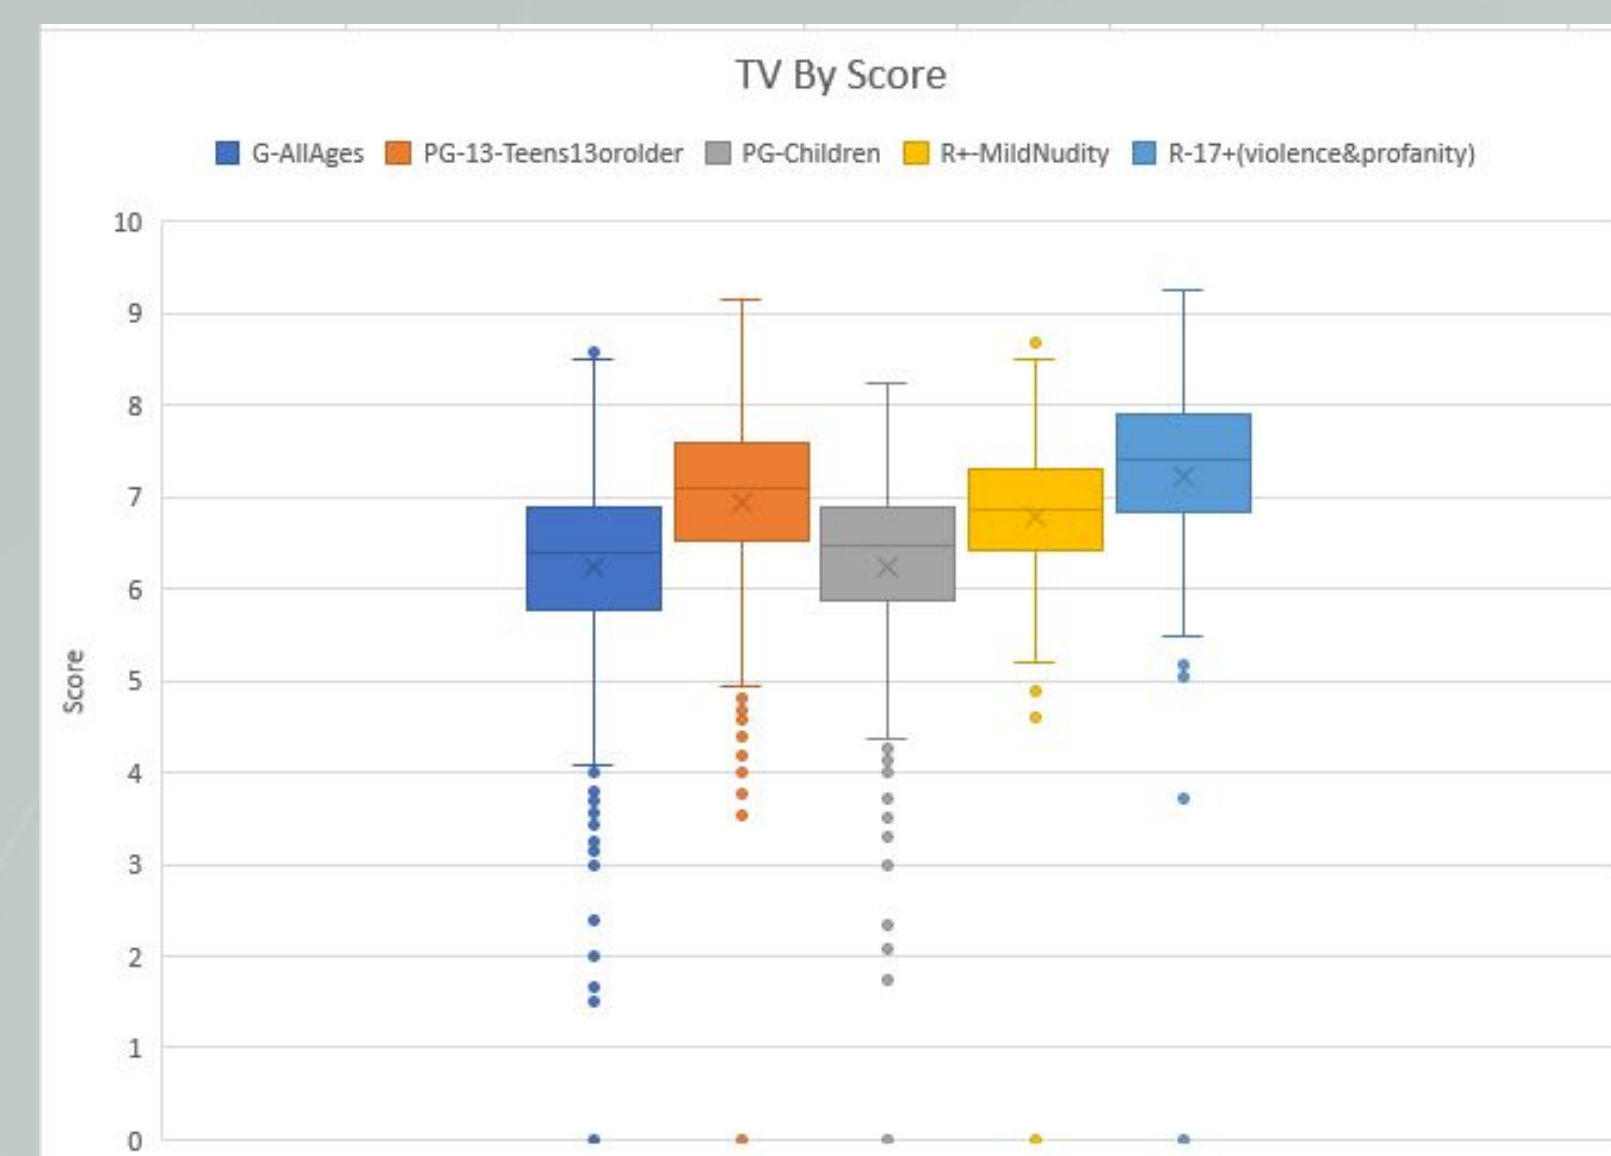

David Sugirdorj  
NWMSU

## Score

Question: Does type and rating affect the score given on Anime in MAL?

## Box and Whiskers chart

Results are separated by type

Based on the Question that was asked at the beginning of the project and given the results. I am happy to say that there was a correlation between type and rating to score.

The results were compiled from a list of over 14000 data points.

The conclusion is that type and rating has a direct influence to score. Based on those two categories we can see that, score has overall similar medians in each chart.

## Methods

- Excel
  - Cleaning
  - Creation of charts
- SAS, Weka
  - Data Check
  - Data Organization
